For reasons of better readability, we have partially refrained from using the feminine and masculine form. All personal terms refer equally to women and men.

## Accessibility

We recognize the poor accessibility of gather.town chosen for AUGENBLICK MAL! 2021 puts an unfair burden on disabled people, especially blind, low vision, deaf and hard of hearing participants. The accessibility team has worked closely with the Virtual Reality chairs to layout the virtual space to make the space as easy to navigate as possible for low vision or mobility challenged participants within the constraints of the technology.

### Attention:

Large fold-out maps can easily be overwhelming and participants\* can get lost in them.

Avatars are extremely small and can be a barrier for people with visual impairments.
